

Post-experiment questionnaire

Post experiment questionnaire

- In troubleshooting scenarios, regarding the **diagnosis phase**, I prefer
 - 1 - Being guided through potential diagnoses one step at a time to identify the cause
 - 2
 - 3
 - 4
 - 5 - Seeing a complete overview of all potential diagnoses upfront
- In troubleshooting scenarios, regarding the **solution phase**, I prefer
 - 1 - Being guided through the solution steps one at a time
 - 2
 - 3
 - 4
 - 5 - Seeing a complete overview of all the solution steps or process upfront
- In the event of a cybersecurity issue, how likely would you be to use this kind of troubleshooting chatbot instead of speaking with a human IT representative?
 - 1 - Strongly Disagree
 - 2
 - 3
 - 4
 - 5 - Strongly Agree
- After chatting across several scenarios, how would you describe your overall experience?
What stood out the most, positively or negatively?
